SCAN ME

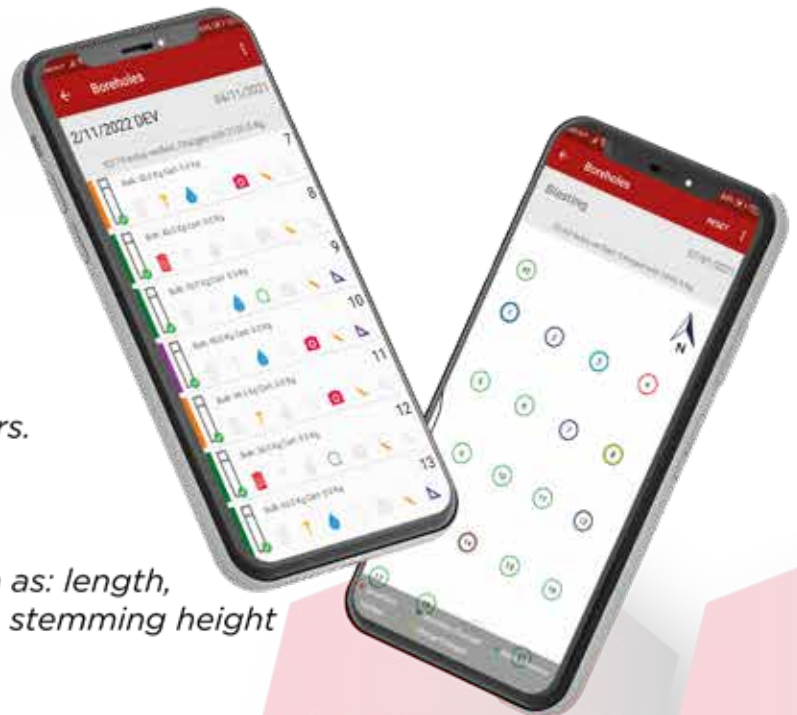

Control your blast operation on your mobile phone with the latest drill&blast QA/QC app. Check the blast progress in real time, control the actual charge per hole, the hole's length, stemming height and the operation main KPIs. Efficiency is now in your hands!

Key features:

- Online control of blast progress.*
- Blast progress control by multiple users.*
- Blast plan download via O-PitCloud.*
- Record of borehole's actual data, such as: length, inclination, position, azimuth, diameter, stemming height and water presence.*
- Possibility of registering explosive kgs (bulk or cartridges) and accessories (boosters or detonators).*
- Storage of borehole information like photos and comments.*
- Automatic blast reports generation.*

The O-PitApp reduces the time involved in compiling the operation information and provides instant feedback of the entire drill&blast progress. Now you can control your projects online and access a wide range of KPIs remotely via a simple click.
